

A story of resilience, perseverance, commitment and success!

Nivel A has been a supporter of the school in its transformation to become a Google Reference School. Nivel A helped with the initial setup of Chromebooks, providing technical ongoing support; & Google Workspace training and coaching for teachers.

The challenge

The school took the challenge of presenting to their educational community an option to their technological and innovation needs. Teachers needed to promote innovation, inclusion, creativity, interaction, differentiation, and communication. Oxford Institute was committed to take on this challenge and take advantage of this area of opportunity to continue growing.

The solution

The School's infrastructure was improved to achieve its growth goals and created a professional growth plan that adapted to the needs of all teachers, regardless of their level of tech skills or confidence in the classroom. A key element was the close communication between the staff, the administration, and the partner, for the success of the project.

The results

-Students in the different divisions have access to Google Workspace tools through their institutional account and the use of Chromebooks in a 1: 1 program -Teachers have ongoing training, the school currently has: 21 Google Certified Level 1 Educators 12 Level 2 Certified Google Educators -Infrastructure was updated and it allows safe and stable connectivity for the entire educational community.

“We strongly recommend the services of Nivel A. We have worked together for the last year and a half, and they do an excellent job not only providing assistance but also inspiring us to grow. Their services meet all of our needs of educational innovation through constant training, effective and immediate technical support, and infrastructure solutions tailored for our school. They are simply the best ”

Erika Treviño Quintanilla, Academic Coordinator
